

HAND WASHING PROCEDURE with Alcohol-based Formulation

Source: World Health Organization. WHO Guidelines on Hand Hygiene in Health Care, 2009, page 155.

- Rub hands together, covering all surfaces of hands and fingers, until hands are dry
- Do not rinse.
- **Note:** When there is visible soiling of hands, they should first be washed with soap and water before using waterless hand rubs, gels or alcohol swabs.
- If soap and water are unavailable, hands should first be cleansed with detergent-containing towelettes, before using the alcohol-based hand rub, gel or swab.
